

## Water in Abundance!

6 January 2010

### Chapter 2

Pipeline Phase 2

In our ABAGOLD newsletter of 1 December, we reported on the pipeline project commissioned on 6 October 2009. In order to pump more water to Bergsig farm and save electricity at the same time, a new 700mm pipeline of 450 metres in length was required. This new pipe was routed from the Sea View pumphouse, across the farm and all the way around the perimeter of Bergsig. The second phase of the project can be seen in the photos above - clockwise from top left: A length of pipe is "carted" to its position on the support beams over Sea View. The complete support structure was made from wood (gum poles and laminated beams) which saved cost and will reduce maintenance compared to steel; A pipe length is placed on the support beams; The pipes are laid along Bergsig's perimeter wall.

## A day at the beach

Technical

Teambuilding Day

On 27 November 2009 our Technical Team was treated to a day at the beach. A “braai” (barbeque) was held to celebrate the completion of the Bergsig pipeline and effluent upgrade project. The warm sunshine day was enjoyed by all!

## ABAGOLD Annual General Meeting and Open Day

Annual General Meeting and Open Day 2009

ABAGOLD held its Annual General Meeting of shareholders and Open Day on 16 December 2009. More than 100 shareholders and selected guests celebrated another successful year and were treated with farm tours and a taste of our delicacy.
